# GHANA DEMOGRAPHIC & LABOUR ANALYSIS

Historical Analysis | 1994–2024

## KEY FINDINGS & ANALYTICAL INSIGHTS

- **Overall unemployment:** The average unemployment rate across the dataset is 5.55%.
- **Highest recorded rate:** Unemployment peaked at 10.46% in 2000.
- **Lowest recorded rate:** The lowest unemployment rate was 2.17% in 2013.
- **Data coverage:** The analysis examines 31 annual observations spanning 1994–2024.

**Analytical note:** These findings summarise the dataset's historical unemployment figures. Further analysis of GDP growth, inflation and population growth can help explore how these indicators moved alongside unemployment over time. Observed relationships should not be interpreted as proof of causation.
